An advanced course on OOPs and DSA

AWS Certified Developer Associate
A deep course on AWS tools and insights into each service.

EXPERIENCE

Game Dev Mentor [Part-time]
Outscal ↗
06/2024 – Present | New Delhi, India
***Unity, C++, C#, SFML, Design Patterns, SOLID Architecture***
- Coaching students to learn game development, starting from OOPS to building a resume & portfolio,
- Helping them to clear interviews with ease and land jobs in top Game studios.

Indie Game Developer [Full time]
Hitkraft Games ↗
02/2024 – Present | Chennai, India
Playfab, Cloudscript(JS), Google Cloud Run, AWS(Lambda), Photon, Unity, C#
- My own studio, working on a cool multiplayer word game, a mix of Boggle and Candy Crush *[Check out]* ↗ .
- Except Art and Audio, everything else is handled by me as a solo dev, from **writing net code,** local code, and game design too ^^

Lead Game Developer
Daceg.Ltd ↗
06/2022 – 01/2024 | London, UK
Unity, C#, ExpressJS, NodeJS, Photon Pun, Playfab, CloudRun, Moralis SDK, EtherJS, Solidity, Elasticsearch, Unity Cloud Build(CI/CD), Gamelift, Lambda, DynamoDB
- Lead a team of 8 to build an MMORTS game made with Unity (**Hosting map servers**, Buildings movement, Troop training, Combat mechanics, etc) *[Check out]* ↗
- My other work includes building a mix of Card + RTS genre-type mobile game for both Android and IOS platforms. *[Check out]* ↗

Lead Game Developer
Creatr Studios Inc ↗
03/2021 – 06/2022 | Toronto, Canada
Unity, C#, GraphQL, ExpressJS, NodeJS, Photon, Playfab, CloudRun, Enjin SDK, Facebook SDK, Azure VM
- Led a team for an NFT game project that executes blockchain requests using GraphQL queries/mutations, safely in the **Google Cloud Run** (NodeJS) platform. *[Check out]* ↗
- Utilized Photon Cloud to transmit player inputs through RPC calls, keeping the game state in sync, with each call **cross-verified by PlayFab CloudScript**.

Indie Game Developer
FrostDrakeGames ↗
02/2019 – 03/2021 | Pondicherry, India
Unity, C#, JS, Firebase, Playfab, CloudRun, Blender
- Worked on multiple freelance game projects using Unity,
- Tricky Bounce ↗ & Bubble shooter ↗ both have now over 10M+ downloads,
- Parallelly worked on my personal project, Gambit ↗ , creating 3D models ↗ and assembling the entire web3 game, including the server and local components. Even hosted a Kickstarter campaign ↗ !
