EXPERIENCE

Game Developer

Impacto Digifin Technologies Pvt Ltd 

02/2026 – Present | Bengaluru (Remote)

Worked closely with clients and the dev team as a lead. Shipped a mobile title for both **Android and iOS**.

Game Developer

Outscal 

06/2024 – Present | New Delhi, India

Unity, C++, C#, SFML, Design Patterns, SOLID Architecture
Coached students to learn game development, starting from OOPS to building a resume & portfolio. Helped **30 students land their first job in the Games industry!**

Indie Game Developer

Hitkraft Games 

02/2024 – Present | Chennai, India

Playfab, Cloudscript(JS), Google Cloud Run, AWS(Lambda), Photon, Unity, C#

- Worked on a cool multiplayer word game part-time, a mix of Boggle and Candy Crush [**Android**,  **iOS** ].
- Except Audio, everything else is handled by me as a solo indie dev, from **writing net code**, art, **UI animations**, and game design too ^^

Lead Game Developer

Daceg.Ltd 

06/2022 – 01/2024 | London, UK

Unity, C#, ExpressJS, NodeJS, Photon, Playfab, CloudRun, Solidity, Elasticsearch, Unity Cloud Build(CI/CD), Gamelift, Lambda, DynamoDB

- Lead a team of 8 to build an MMORTS game made with Unity (**Hosting map servers**, building movement, Troop training, Combat mechanics, etc) [**Check out**]. 
- Also built a mix of Card + RTS genre-type mobile game for both Android & IOS platforms. [**Check out**]. 

Lead Game Developer

Creatr Studios Inc 

03/2021 – 06/2022 | Toronto, Canada

Unity, C#, GraphQL, ExpressJS, NodeJS, Photon, Playfab, CloudRun, Enjin SDK, Facebook SDK, Azure VM

- Led a team for an NFT game project with a robust backend on **Google Cloud Run** (NodeJS) platform. [**Check out**]. 
- Utilized Photon Cloud for RPC, keeping the game state in sync, with each call **cross-verified by PlayFab CloudScript**.

Indie Game Developer

FrostDrakeGames 

02/2019 – 03/2021 | Pondicherry, India

Unity, C#, JS, Firebase, Playfab, CloudRun, Blender

- **Tricky Bounce**  & **Bubble Shooter**  both have now over 10M+ downloads (Client projects),
- My personal project include **Gambit** , **creating 3D models** . Even hosted a **Kickstarter campaign** !
